Getting Started with PASS®

PAR-x solutions®

XADAGO and PARx help streamline the Prior Authorization (PA) process

Managing Prior Authorizations

PARx Solutions® was created to help patients get the medications prescribed by their healthcare provider (HCP). PARx accomplishes this mission by helping prescribers navigate the obstacles of Prior Authorization.

How does it work?

The PARx Prior Authorization Support System (PASS)® uses a secure, online portal that allows prescribers to manage PA requests for their patients' medications through a simple, streamlined process.

PASS® takes all the required information that health plans need for their PA review and populates it into a simple format. Using this easy-to-complete electronic format with pre-populated fields and drop-down menus, PASS® collects the appropriate information.

Improve the chances that your patients will get coverage for the medications you prescribe.

Key features of PASS®

- No cost to prescribers
- HIPAA-compliant portal is easy to navigate and uses a universal PA format for all plans
- Available to all HCPs—as a guest or registered user
- Easy-to-complete electronic format with pre-populated fields and drop-down menus help capture required information
- All submissions reviewed for accuracy and completeness
- PARx professional staff helps manage follow-up with plans
- Practice is notified of PA outcome and can check PA status online at any time
- Single login for multiple providers and easy upload feature for chart notes maximizes user convenience

Try PASS® today!

- Go to **www.PARxSolutions.com** and click on "Submit a PA"
- If your practice is registered, enter your login credentials—otherwise, click on "Continue as Guest User"
- Complete the Prior Authorization request
